RIGID FRAME DOCK SHELTERS

FEATURES

Comfort Tech Rigid Frame Dock Shelters are designed to service a wide variety of truck sizes and types regardless of dock door size or bumper projection. As trucks back into the dock shelter, the face curtains wrap around truck sides and top for positive weather protection ensuring reduced energy costs, loading safety, and product protection. The full trailer opening remains accessible for unrestricted loading and unloading. Our dock shelters easily accommodate 8'6" wide trailers.

Comfort Tech offers a wide variety of dock shelter cover fabrics and unit sizes to custom build a dock shelter designed to meet your application requirements. Years of experience result in the proven craftsmanship and quality construction, providing you the best value for your investment.

RIGID FRAME SHELTER

A rigid framework combined with a wide range of cover fabrics make our Rigid Frame Dock Shelters suitable for even the heaviest traffic application. All lumber frames are pressure treated, fiberglass stays sewn into the face curtains plus a foam edge on both vertical side curtains maintain constant pressure against the truck for positive weather protection. A translucent fiberglass panel on the top and fabric covered side frames permit good visibility for improved operator safety. Wear Pleats on the head curtain ends and extra wear areas on the side curtains add durability at the critical truck contact points.

HEAD CURTAIN

Choice of many heavy duty fabrics, all with fiberglass stays and wear pleats on each end of the head curtain at high wear truck contact points.

SIDE CURTAINS

Same fabric as head curtain with fiberglass stays, and extra fabric layers on bottom of curtains at critical truck contact points.

FOAM EDGE

Fabric covered closed-cell foam strip on leading edge of side curtains for a snug fit against trailer sides.

GUIDE STRIPE

18oz Yellow guide stripe to assist the driver position the trailer correctly.

BOTTOM DRAFT CUSHIONS

Foam filled to seal off bottom of shelter. Independent of side Curtains for easy and economical replacement. High visibility yellow "NO STEP" printed on draft cushion for worker safety.

HEAD FRAME

2" x 6" Pressure treated lumber, peaked at center to prevent snow and water build-up, and covered with a translucent fiberglass panel to allow light into the loading area.

SIDE FRAME

2" x 4" Pressure treated lumber covered with a translucent panel which also allows light into the dock.

PROTECTIVE STEEL BUMPERS

Factory painted steel channel bumpers to protect shelter frame.

DECLINE OR INCLINE

Tapered dock shelter projections are available to accommodate different sloped drive conditions.
