FOAM FRAME DOCK SHELTERS

FEATURES

Comfort Tech Soft-Side Dock Shelters are designed to service a wide variety of truck sizes and types regardless of dock door size or bumper projection. As trucks back into the dock shelter, the face curtains wrap around the trailer sides and top for positive weather protection. This helps reduced energy costs, improve operator safety, and product protection. The full trailer opening remains accessible for unrestricted loading and unloading. Our dock shelters easily accommodate the 8'6" wide trailers.

Comfort Tech offers a wide variety of dock shelter features, cover fabrics and unit sizes to custom build a dock shelter designed to meet your application requirements. Years of experience result in the proven craftsmanship and quality construction, providing you the best value for your investment.

FOAM SIDE FRAMES

High-density foam side frames combined with a wide range of cover fabrics make our Soft-Side Dock Shelters suitable for even the heaviest traffic applications. All wood backboards are made of pressure treated wood, fiberglass stays sewn into the face curtains plus a foam edge on both vertical side curtains maintain constant pressure against the sides of the trailer for positive weather protection. A Translucent fiberglass panel on the top allows light into the area for improved operator safety.

HEAD CURTAIN

Choice of many heavy duty fabrics, all with flexible fiberglass stays and wear pleats on each end of the head curtain and high wear truck contact points.

SIDE CURTAINS

Same fabric as head curtain with fiberglass stays, and extra fabric layers on bottom of curtains at critical truck contact points.

FOAM EDGE

Fabric covered closed-cell foam strip on leading edge of side curtains for a snug fit against trailer sides.

GUIDE STRIPE

18oz Yellow guide stripe to assist the driver position the trailer correctly.

BOTTOM DRAFT CUSHIONS

Foam filled to seal off bottom of shelter. Independent of side Curtains for easy and economical replacement. High visibility yellow "NO STEP" printed on draft cushion for worker safety.

HEAD FRAME

2" x 6" Pressure treated lumber, peaked at center to prevent snow and water build-up, and covered with a white translucent fiberglass panel to allow light into the dock door area for better visibility.

SIDE FRAME

2" x 4" Pressure treated lumber covered with a translucent panel which also allows light into the dock door area.

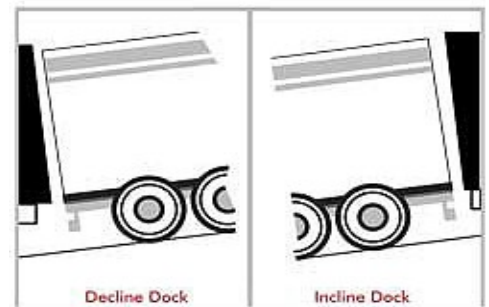

FULL ACCESS

Soft-Side Dock Shelters provide full width and height access to the back of the trailer for improved productivity.

DECLINE OR INCLINE

Tapered dock shelter projections are available to accommodate different sloped drive conditions.
